Together, utilizing technology, we will favorably embrace the opportunities in the emerging global market.

# S.T.A.M.P.E.D *Guidelines for selecting the proper hose for your application*

**Size**  
Select the appropriate size that is suitable for the inside and outside diameters, also determine the length of the hose assembly

**Application**  
Determine not only the climatic conditions but also the condition of use such as flexing, kinking, crushing and degrees of bending

**Pressure**  
Know the working pressure of the hose assembly including pressure spikes

**Delivery**  
Know the time frame needed for delivery, testing, quality assurance and packaging

**Ends**  
Choose the appropriate end connection and the correct method for application

**Temperature**  
Know the temperature of the fluid being conveyed and the climatic conditions

**Material**  
Understand the composition and concentration of the substance being conveyed & its compatibility with the hose
