

## high performance fluoropolymer and fluoroplastic tubing and pipe

### Altaflo is an innovative producer of high performance fluoropolymer and fluoroplastic tubing and pipe.

All Altaflo products are manufactured using 100% virgin grade high performance resins to provide the best physical properties for your application.

We carry a broad range of stock products in PTFE, FEP, PFA, UHP PFA, PVDF and THV materials that are available to ship same day from our extensive inventory.

Altaflo is able to quickly and cost-effectively produce custom items from these and other fluoropolymer or fluoroplastic resins to meet your requirements. Please contact our sales department for details.

# high performance fluoropolymer and fluoroplastic tubing and pipe

## ALTAFLUOR® 2EO

ALTAFLUOR® 2EO ENVIRO SERIES FEP (fluorinated ethylene propylene), is designed specifically for use in environmental sampling applications. This cost effective choice is the preferred product for applications requiring the purity of FEP without exposure to aggressive chemical or other harsh conditions. ALTAFLUOR® 2EO Series FEP does not impart taste, odor or other contaminants. For more critical application requirements, we suggest the use of ALTAFLUOR® 200 FEP OR ALTAFLUOR® 400 PFA Tubing.

### ALTAFLUOR® 2EO Features:

- Excellent UV transmission
- Low permeability
- High thermal stability
- Excellent clarity
- Moisture absorption nearly zero
- Does not impart taste, odor or contaminants
- Non-flammable

### Applications

- Ground water monitoring
- Air sampling
- Laboratory applications
- Water process
- UV water purification systems

### Specifications

**General:** FEP meets the requirements listed in ASTM D2116

**Temperature:** -100°F to 400°F

**Flammability:** FEP is non-combustible and does not promote flame spread.

### ALTAFLUOR® 2EO FEP ENVIRO – Enviro Tubing

PART NUMBER	ID	OD	+/-	WALL	+/-
2EO-0250-030-XX	3/16	1/4	.005	.030	.003
2EO-0313-030-XX	1/4	5/16	.005	.030	.003
2EO-0375-030-XX	5/16	3/8	.005	.030	.003
2EO-0500-030-XX	7/16	1/2	.005	.030	.003
2EO-0250-040-XX	.170	1/4	.005	.040	.003
2EO-0375-062-XX	1/4	3/8	.005	.062	.003
2EO-0500-062-XX	3/8	1/2	.005	.062	.003

Additional sizes up to 3" OD are available as custom extrusions – minimum order requirements may apply. Please contact Altaflo office for details.

This tubing is not recommended for aggressive chemical applications – please refer to ALTAFLUOR® 200 or ALTAFLUOR® 400.

### ALTAFLUOR® 2EO FEP ENVIRO – Bend Radius and Working Pressure Chart

PART NUMBER	OD	WALL	ID	BEND RADIUS	WORKING PRESSURE @ 73°F
2EO-0250-030-XX	0.188	0.250	.030	1"	195
2EO-0313-030-XX	0.250	0.313	.030	1-3/4"	156
2EO-0375-030-XX	0.313	0.375	.030	2-1/2"	130
2EO-0500-030-XX	0.438	0.500	.030	6"	97
2EO-0250-040-XX	0.170	0.250	.040	1"	260
2EO-0375-062-XX	0.250	0.375	.062	1"	269
2EO-0500-062-XX	0.375	0.500	.062	2"	200

The above information is based on tests performed at 73° F and can vary in individual applications based on parameters such as temperature, chemical concentration, pressure, etc. Please consult factory for details. For an estimate on burst pressure at ambient temperature we consider a 3:1 ratio when exposure temperature is 73° F. However Altaflo does not recommend exceeding the suggested Working Pressure listed.

# high performance fluoropolymer and fluoroplastic tubing and pipe

## ALTAFLUOR® 100

PTFE (polytetrafluoroethylene) was the original Teflon® material first developed by the E.I. DuPont Co. PTFE is the most flexible of all fluoropolymers offered. ALTAFLUOR 100 PTFE has the broadest temperature range of any fluoropolymer and can resist highly corrosive liquids and gases even at elevated temperatures. The smooth surface finish and lowest coefficient of friction & lubricity make it ideal for bushing or bearing applications. Lengths may be limited due to batch size – please call to confirm available lengths at time of order. ALTAFLUOR 100 is compatible with most standard fittings (not suitable for use with flare-type fittings).

### ALTAFLUOR® 100 Features:

- 100% virgin grade PTFE resins
- Most flexible fluoropolymer
- Chemically inert and resistant to nearly all industrial chemicals and solvents
- Low permeability
- Smooth non-stick surface finish
- Lowest coefficient of friction
- Excellent electrical properties
- Non-Flammable
- Non-Toxic
- FDA Compliant
- Suitable for use with conventional fittings

### Applications

- Laboratory
- Chemical Process
- Analytical and process equipment
- Cryogenic applications
- Electrical applications
- High Temperature applications
- Automotive

### Specifications

**General:** Meets or exceeds the requirements listed in ASTM D 3295 (except for dimensional on specific items)

**Temperature:** -410° F to 500° F continuous / 550° F short-term

**Flammability:** PTFE tubing resists combustion and does not promote flame spread. PTFE resin used for production of ALTAFLUOR® 100 series is UL 94 VO rated.

**FDA:** PTFE is approved for use in food contact applications in compliance with FDA regulation: 21 CFR 177.1550

# high performance fluoropolymer and fluoroplastic tubing and pipe

## ALTAFLUOR® 200

FEP (fluorinated ethylene propylene) is an economical choice for applications requiring chemical resistance in combination with broad temperature exposure. ALTAFLUOR 200 FEP offers excellent clarity which makes it ideal for sight glass/flow monitoring applications. Additionally, the outstanding UV transmission rate of FEP makes it a clear choice for UV water purification systems. ALTAFLUOR 200 tubing may be used with flare or conventional fittings.

### ALTAFLUOR® 200 Features:

- 100% virgin grade high performance resins used to resist stress cracking
- Chemically inert to most industrial chemicals and solvents
- High thermal stability
- Excellent UV transmission
- Low permeability
- Moisture absorption nearly zero
- FDA compliant for food contact
- Non-flammable
- Superior electrical insulation properties
- Available in coiled hose, convoluted and heat-shrink constructions

### Applications

- Chemical process
- Laboratory applications
- UV water purification systems
- Ground water monitoring
- Food processing
- Electrical insulation
- Automotive

### Specifications

General: Meets or exceeds the requirements listed in ASTM D 3296 and ASTM D 2116

Temperature: -100°F to 400°F

Flammability: FEP resists combustion and does not promote flame spread

FDA: ALTAFLUOR® 200 FEP is approved for use in food contact applications in compliance with FDA regulation: 21 CFR 177.1550.

USP CLASS VI: ALTAFLUOR 200 FEP meets the requirements of USP Class VI

# high performance fluoropolymer and fluoroplastic tubing and pipe

## ALTAFLUOR® 350

THV FLEX (tetrafluoroethylene-hexafluoropropylene-vinylidene fluoride) has a unique combination of properties making it the preferred choice for many applications. THV is ideal for use in applications requiring excellent UV light transmission combined with the safety and flexibility of plastic. THV FLEX grade has the flexibility of traditional PVC flex tubing combined with chemical resistance much closer to that of FEP. THV is available in a variety of compositions each designed for specific performance values. ALTAFLUOR 300 Series uses THV FLEX grade which allows for greatest flexibility, permeation resistance and good chemical resistance, but with slightly reduced upper service temperature over other grades. ALTAFLUOR 350 also has excellent bondability with other materials which allows for multi-layer extrusions. For more product specific information please contact your ALTAFLUOR representative.

### ALTAFLUOR® 350 Features:

- 100% virgin grade THV FLEX grade
- Highest UV & visible light transmission of any fluoropolymer
- Most flexible fluoropolymer
- Good chemical resistance
- Superior weatherability
- Excellent bondability
- Excellent ozone resistance
- Extremely low permeation

### Applications

- Automotive fuel transport systems\*
- Laboratory
- Solar energy
- UV purification systems
- Fiber optic
- Chemical process

\* Component in multi-layer product

### Specifications

**Temperature:** -40 °F to 212 °F

**Flammability:** UL 94 V0 rated. THV FLEX grade resists combustion and does not promote flame spread

### ALTAFLUOR® 350 THV FLEX – Tubing

### ALTAFLUOR® 350 THV FLEX – Bend Radius and Working Pressure Chart

PART NUMBER	OD	WALL	ID	BEND RADIUS	WORKING PRESSURE @ 73°F
350-0250-030-0C	0.250	0.030	0.188	1"	223
350-0250-040-0C	0.250	0.040	0.170	1"	297
350-0250-062-0C	0.250	0.062	0.125	1/2"	460
350-0375-062-0C	0.375	0.062	0.250	1"	307

The above information is based on tests performed at 73° F and can vary in individual applications based on parameters such as temperature, chemical concentration, pressure, etc. Please consult factory for details. For an estimate on burst pressure at ambient temperature we consider a 3:1 ratio when exposure temperature is 73° F. However Altaflo does not recommend exceeding the suggested Working Pressure listed.

### ALTAFLUOR® 350 Series THV FLEX – Physical Properties

## ALTAFLUOR® 400

Due to the nature of applications involving the use of fluoropolymers, we suggest that all customers test product within the conditions specific to their application prior to use.

### ALTAFLUOR® 400 Series PFA – Physical Properties

PHYSICAL PROPERTY	ASTM TEST METHOD	UNITS	VALUES
Upper Service Temp.			500° F
Specific Gravity	D 792		2.15
Tensile Strength	D 1708	PSI	4200
Elongation	D 638	%	400
Flex Modulus	D 790	PSI	90,000
MIT Flex Life	D 2176		500,000+
Hardness	D 2240	Shore D	60

The above information is based on tests performed at 73° F and can vary in individual applications based on parameters such as temperature, chemical concentration, pressure, etc. Please consult factory for details.

NOTE: The values represented above are based on the use of 100% virgin grade high performance - low melt flow PFA resin as used in the production of ALTAFLUOR 400 Series Tubing. When comparing data it is critical that performance values are listed for the grade of resin used.

**NEW: High Purity PFA is available – please see  
ALTAFLUOR 480 SERIES UHP PFA**

# high performance fluoropolymer and fluoroplastic tubing and pipe

## ALTAFLUOR® 400

PFA (perfluoroalkoxy) is the product of choice for applications involving extreme chemical resistance combined with high temperature exposure. Although PFA is available in a variety of resin grades, ALTAFLUOR 400 PFA tubing is made exclusively from the highest molecular weight resins available giving it superior physical properties making it suitable for even the most demanding applications. ALTAFLUOR 400 is compatible with flare or conventional type fittings.

### ALTAFLUOR® 400 Features

- 100% virgin grade high performance resins used to resist stress cracking
- Chemically inert to nearly all industrial chemicals and solvents
- Higher thermal stability than with FEP
- Lower permeability than with FEP
- Translucent
- Moisture absorption nearly zero
- FDA compliant for food contact
- Non-flammable
- Suitable for use with flare or conventional fittings
- Available in coiled hose and convoluted constructions
- Low permeation PFA tubing is also available

### Applications

- Chemical process
- Heat exchangers
- Laboratory applications
- Semiconductor
- Flow monitoring
- Food processing
- Electrical insulation
- Automotive

### Specifications

**General:** Meets or exceeds the requirements listed in ASTM D 6867-03

**Temperature:** -300 °F to 500 °F

**Flammability:** UL 94 V0 rated. PFA resists combustion and does not promote flame spread

**FDA:** ALTAFLUOR 400 PFA is approved for use in food contact applications in compliance with FDA regulation: 21 CFR 177.1550

**USP CLASS VI:** Altafluor 400 meets the requirements of USP Class VI

# high performance fluoropolymer and fluoroplastic tubing and pipe

## ALTAFLUOR® 480

Due to the nature of applications involving the use of fluoropolymers, we suggest that all customers test product within the conditions specific to their application prior to use.

### ALTAFLUOR® 480 Series PFA – Physical Properties

PHYSICAL PROPERTY	ASTM TEST METHOD	UNITS	VALUES
Upper Service Temp.			500° F
Specific Gravity	D 792		2.15
Tensile Strength	D 1708	PSI	4500
Elongation	D 638	%	400
Flex Modulus	D 790	PSI	90,000
MIT Flex Life	D 2176		1,750,000
Hardness	D 2240	Shore D	60

The above information is based on tests performed at 73° F and can vary in individual applications based on parameters such as temperature, chemical concentration, pressure, etc. Please consult factory for details.

NOTE: The values represented above are based on the use of 100% virgin grade high performance - low melt flow PFA resin as used in the production of ALTAFLUOR 480 Series Tubing. When comparing data it is critical that performance values are listed for the grade of resin used.

### ALTAFLUOR® 480 PFA – Bend Radius and Working Pressure Chart

PART NUMBER	OD	WALL	ID	BEND RADIUS	WORKING PRESSURE @ 73°F
480-0125-030-OC	0.125	0.030	0.062	1/2"	451
480-0250-030-OC	0.250	0.030	0.188	1"	226
480-0250-040-OC	0.250	0.040	0.170	1"	301
480-0250-047-OC	0.250	0.047	0.157	3/4"	353
480-0250-062-OC	0.250	0.062	0.125	1/2"	466
480-0375-062-OC	0.375	0.062	0.250	1"	311
480-0500-062-OC	0.500	0.062	0.375	2"	233
480-0750-062-OC	0.750	0.062	0.625	6"	155
480-1000-062-OC	1.000	0.062	0.875	22"	117
480-1250-075-OC	1.250	0.075	1.100	25"	49

#### METRIC SIZES

480-0236-040-OC	0.236	0.040	0.157	1-3/4"	313
	6mm	1mm	4mm		
480-0315-040-OC	0.315	0.040	0.236	2-1/2"	235
	8mm	1mm	6mm		
480-0394-040-OC	0.394	0.040	0.315	2-3/4"	188
	10mm	1mm	8mm		

The above information is based on tests performed at 73° F and can vary in individual applications based on parameters such as temperature, chemical concentration, pressure, etc. Please consult factory for details. For an estimate on burst pressure at ambient temperature we consider a 3:1 ratio when exposure temperature is 73° F. However Altaflo does not recommend exceeding the suggested Working Pressure listed.

Additional sizes up to 2" are available.

Available in natural color only. For pigmented items, see ALTAFLUOR 400 series.

## high performance fluoropolymer and fluoroplastic tubing and pipe

### ALTAFLUOR® DUAL CONTAINMENT TUBING

*The CLEAR CHOICE for semiconductor, pharmaceutical,  
and other critical chemical systems*

ALTAFLUOR DC SERIES DUAL CONTAINMENT TUBING provides end users with an integrated fluid flow solution for critical processes where high purity and safety are primary concerns.

The inner tube, produced exclusively from 100% Virgin Daikin AP231SH UHP PFA resin, ensures the greatest overall performance in critical and aggressive applications. The outer tube, constructed of 100% Virgin grade FEP not only provides excellent clarity for visual inspection, but offers enhanced protection against product damage or personal injury from possible leaks that may occur during the chemical delivery process. The Tube-in-Tube design does not introduce contaminants during the installation process and the ability to provide ALTAFLUOR Dual Containment Tubing in long continuous lengths reduces the need for excess connections thereby reducing the overall system cost.

#### Key Properties

- Daikin AP-231SH UHP PFA Semi -F57 approved resin
- Produced and packaged in a clean room environment
- Ends capped – custom dual containment end caps
- Extremely low extractable levels: metallic and organic
- Excellent chemical resistance – (even with common Fluorosurfactants known to attack lower PFA grades)
- Low permeability
- Extremely smooth surface finish
- Highest mechanical performance vs other PFA and HP PFA tubing products
- Flex life comparable with PTFE
- Laser marked for complete traceability
- Flame resistant – fluoropolymers meet UL 94 V0

#### Custom Applications

- Custom laser marking
- Custom packaging: straight lengths, short cut-to-length parts
- Private Labeling
- Additional sizes and material selections available upon request

# high performance fluoropolymer and fluoroplastic tubing and pipe

## ALTAFLUOR® 480

ALTAFLUOR 480 UHP PFA (ultra high purity perfluoroalkoxy) is the product of choice for applications involving extreme chemical resistance combined with high purity requirements. Although HP PFA is available in a variety of resin grades, ALTAFLUOR 480 UHP PFA tubing is made exclusively from a high molecular weight, high purity resin that provides excellent chemical resistance, (even to common fluorosurfactants), highest purity levels, low permeation levels and smoothest surface finish. Unlike standard HP PFA tubing products, ALTAFLUOR 480 Series UHP PFA has superior flex life values comparable to those of PTFE.

ALTAFLUOR 480 UHP PFA tubing is ideal for use with flare or conventional fittings.

### ALTAFLUOR® 480 Features

- 100% virgin grade high performance resins used to resist stress cracking
- Chemically inert to nearly all industrial chemicals and solvents
- Highest thermal stability
- Lowest permeation (even with aggressive chemicals such as HCL)
- Smoothest surface finish resulting in less area of particle entrapment
- Translucent
- Moisture absorption nearly zero
- FDA compliant for food contact
- Non-flammable
- Suitable for use with flare or conventional fittings
- Available in coiled hose and convoluted constructions

### Applications

- Semiconductor
- Chemical process
- Heat exchangers
- Laboratory applications
- Flow monitoring
- Pharmaceutical

### Specifications

**General:** Meets or exceeds the requirements listed in ASTM D 6867-03

**Temperature:** -320 °F to 500 °F

**Flammability:** UL 94 VO rated. UHP PFA resists combustion and does not promote flame spread

**FDA:** UHP PFA is approved for use in food contact applications in compliance with FDA regulation: 21 CFR 177.1550.

**USP CLASS VI:** Altafluor 480 meets the requirements of USP Class VI

# high performance fluoropolymer and fluoroplastic tubing and pipe

## ALTAFLUOR® 500

PVDF (Polyvinylidene Fluoride) is an abrasion resistant fluoropolymer suitable for use in applications requiring chemical resistance with low permeability. Altafluor 500 PVDF is the most abrasion and temperature resistant of the PVDF products offered. Altafluor 500 provides excellent abrasion resistance and mechanical strength in use with many chemicals and solvents. With its extremely low extractable levels, Altafluor 500 is excellent for use in ultra pure water systems. Altafluor 500 is suitable for use with conventional fittings but is not recommended for use with flare fittings.

### ALTAFLUOR® 500 Features

- 100% virgin grade KYNAR® PVDF
- Excellent abrasion resistance
- Low permeability
- Good chemical resistance
- UV resistant
- FDA Compliant

### Applications

- Chemical process
- Semiconductor
- Water process systems
- Aquarium

### Specifications

**General:** Resins meet or exceed requirements listed in ASTM D 3222

**Temperature:** -20° F to 250° F

**Flammability:** UL 94-V0 rated KYNAR® PVDF resists combustion and does not promote flame spread

**FDA:** KYNAR® PVDF is approved for use in food contact applications in compliance with FDA regulation 21 CFR 177.1500

### ALTAFLUOR® 500 PVDF – Tubing

PART NUMBER	ID	OD	+/-	WALL	+/-
-------------	----	----	-----	------	-----

ALTAFLUOR 500 is produced from a KYNAR® homopolymer PVDF resin and is available as a custom order. Minimum order requirements apply. Please consult factory for sizes and availability.

For Flexible PVDF, please see ALTAFLUOR 550 series.

### ALTAFLUOR® 500 Series PVDF – Physical Properties

PHYSICAL PROPERTY	ASTM TEST METHOD	UNITS	VALUES
Upper Service Temp			250° F
Specific Gravity	D 792		1.77-1.79
Tensile Strength	D 1708	PSI	5000-7000
Elongation	D 638	%	50-200
Flex Modulus	D 790	PSI	240,000-300,000
Hardness	D 2240	Shore D	76-80

The above information is based on tests performed at 73° F and can vary in individual applications based on parameters such as temperature, chemical concentration, pressure, etc. Please consult factory for details. For an estimate on burst pressure at ambient temperature we consider a 3:1 ratio when exposure temperature is 73° F. However Altaflo does not recommend exceeding the suggested Working Pressure listed.

# high performance fluoropolymer and fluoroplastic tubing and pipe

## ALTAFLUOR® 550

Due to the nature of applications involving the use of fluoropolymers, we suggest that all customers test product within the conditions specific to their application prior to use.

### ALTAFLUOR® 550 PVDF FLEX – Tubing

PART NUMBER	OD	WALL	ID	BEND RADIUS	WORKING PRESSURE @ 73°F
550-0125-030-OC	0.125	0.030	0.062	1/2"	451
550-0188-030-OC	0.188	0.030	0.125	3/4"	168
550-0250-030-OC	0.250	0.030	0.188	1"	126

# high performance fluoropolymer and fluoroplastic tubing and pipe

## ALTAFLUOR® 550

PVDF FLEX (polyvinylidene fluoride - commonly known by the trade name KYNAR FLEX®) is a more flexible version of PVDF suitable for use with flare fittings.\* ALTAFLUOR 550 Tubing is resistant to many commonly used industrial fluids and gasses, including ozone, and does not support the growth of fungi. For this reason ALTAFLUOR 550 tubing is preferred for water disinfecting processes involving ozone such as aquarium, spa, pool and agriculture. Additionally, it is ideal for applications with exposure to less aggressive chemicals and lower temperature exposure (over FEP or PFA) or those requiring low extractable levels. ALTAFLUOR 550 is available in many standard sizes available to ship from stock. Custom sizes are available upon request.

\* Suggest use of heat flare system with ALTAFLUOR 550 TUBING

### ALTAFLUOR® 550 Features

- 100% virgin grade KYNAR FLEX® PVDF
- Chemically resistant to many industrial chemicals and solvents including acids, chlorinated chemicals, brominated chemicals, alcohols, and hydrocarbons.
- Low smoke and flame properties
- Resistant to bacteria and fungal growth
- Good abrasion resistance
- Low permeability
- Excellent creep resistance
- Excellent thermal stability
- Better flexibility (over ALTAFLUOR 500)
- UV resistant
- Nuclear radiation resistant
- FDA compliant

### Applications

- Metal preparation
- Food & beverage
- Petrochemical processing
- High purity semiconductor
- Water purification
- Chemical process
- Nuclear waste
- Ultra-pure water process systems
- Pulp & paper
- Aquarium
- Pool & spa

### Specifications

**General:** Resin meets or exceeds requirements listed in ASTM D 3222

**Temperature:** -20° F to 212° F

**Flammability:** UL 94-V0 rated KYNAR FLEX® PVDF resists combustion and does not promote flame spread

**FDA:** KYNAR FLEX® PVDF is approved for use in food contact applications in compliance with FDA regulation 21 CFR 177.2600

**NSF:** Tubing is produced using NSF 51 and NSF 61 certified resin

# high performance fluoropolymer and fluoroplastic tubing and pipe

## ALTAFLUOR® 600

MFA (perfluoro methyl alkoxy) is a co-polymer of tetrafluoroethylene and perfluoromethyl vinyl ether. MFA is similar in characteristics and performance to PFA.

Like PFA resins, ALTAFLUOR 600 resins provide excellent stress crack and chemical resistance. It has purity levels equal or better than most standard PFA resins. Additionally, the ultra-smooth surface finish of ALTAFLUOR 600 tubing products make them ideal for applications requiring quick and easy clean out. MFA has superior clarity than PFA in UV and visible spectrums. For chemical applications not exceeding 480 °F, ALTAFLUOR 600 tubing may prove to be a cost effective option. ALTAFLUOR 600 tubing may be used with flare or conventional fittings.

### ALTAFLUOR® 600 Features

- 100% virgin grade high performance resin
- Chemically inert to nearly all industrial chemicals and solvents
- Better clarity than PFA in UV and visible spectrums
- Higher service temperature than FEP
- Lower permeability than FEP
- Better impact resistance than PFA
- Smoother surface finish than PFA
- Lower extractable levels than standard FEP and PFA
- Moisture absorption nearly zero
- Non-flammable
- Excellent electrical insulation
- Available coiled

### Applications

- Chemical process
- Paint spray
- Electrical insulation
- Heat exchangers
- Semiconductor
- Automotive

### Specifications

**General:** Meets or exceeds the requirements of ASTM 6314

**Temperature:** -100 °F to 482 °F

**Flammability:** UL 94 V0 rated. MFA resists combustion and does not promote flame spread
